A third-part  
Electronics  
support for

- Select Product
- PrimeFilm XEs super edition
- PrimeFilm XAs super edition
- PowerFilm
- PowerSlide X
- PowerSlide 5000
- PrimeFilm 120 Pro
- PrimeFilm 7200
- PrimeFilm XA
- PrimeFilm XE

Download the driver by clicking the  button to your Downloads folder

Description	Download	File Name
Mac OS 10.7 or higher	<input type="button" value="Download"/>	CyberViewX_Mac_5.18.01.dmg

Step 2: Once downloaded open the Downloads folder and look for the appropriate file for your model scanner

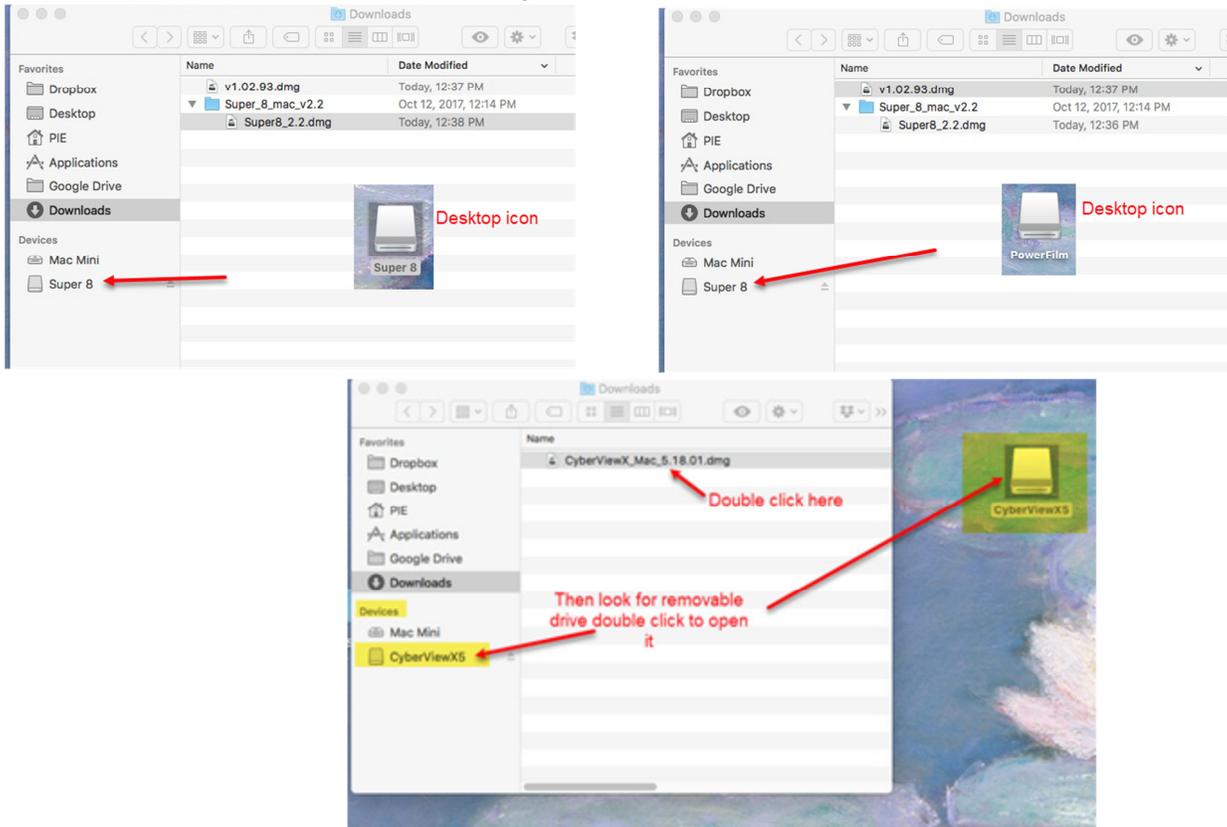

File name examples

**PrimeFilm Series** - CyberViewX\_Mac\_5.18.01.dmg

**PowerFilm** - v1.02.93.dmg

**Super 8+** - Super\_8\_mac\_v2.2.zip

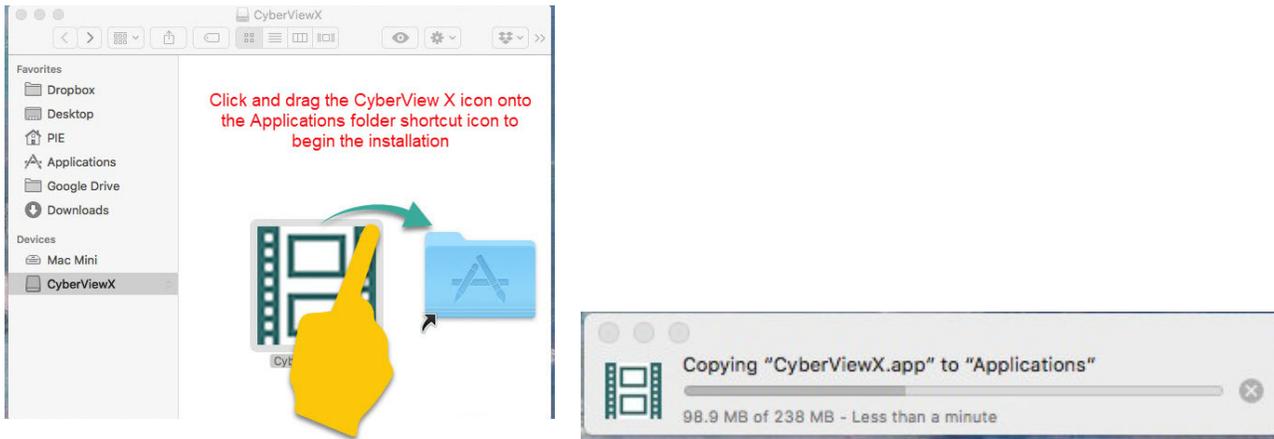

Double click on this file, it will blink briefly then look on your desktop or in the Devices list in the downloads folder for a Removable CyberViewX drive icon

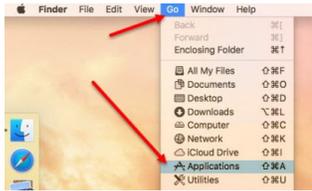

Double click to open this drive, inside there are 2 icons an app installer icon  and a shortcut to

your Applications folder 

Click and drag the app installer, CyberView X, PowerFilm or Super 8+ app icon onto the Applications shortcut folder to begin the install

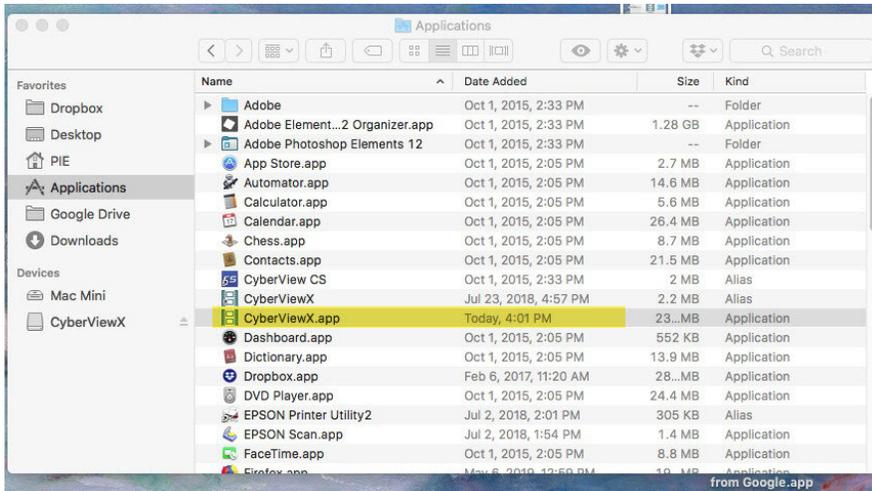

Once completed go to the Applications folder (from the Apple menu click GO - APPLICATIONS)

and locate the CyberView, PowerFilm or Super8 app icon

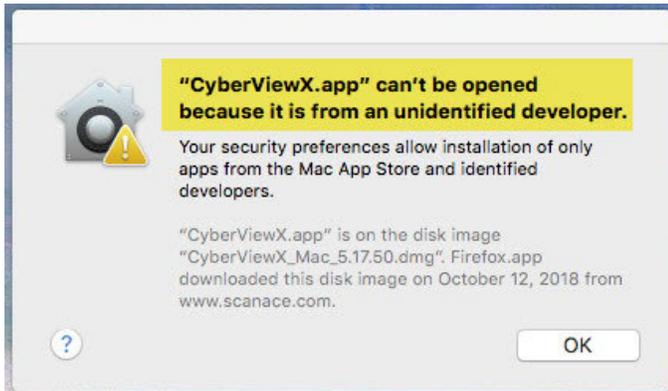

To verify it installed Next make sure the USB cable is connected and turn on your scanner, if it has been powered on while installing restart it by powering off waiting 5 seconds and then power it back on, it will take a few minutes to warm up to a solid light **WAIT** for this light before proceeding.

Power light is solid you may now open the application for scanning (for troubleshooting see next page)

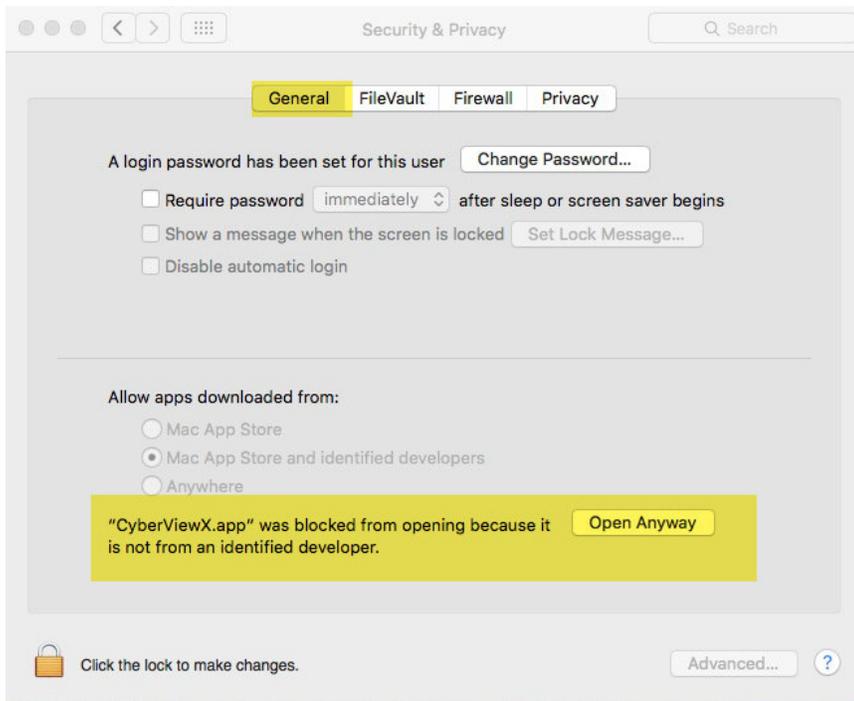

# Troubleshooting

If you receive a warning message follow the steps below

After trying to run the installer you received the above warning

Go to System Preferences (Apple icon – System Preferences- Security and privacy the General Tab, under the Allow Apps downloaded from look for the message XXXX was blocked, and click OPEN ANYWAY to allow it to run

At this point the installer should open and install, if it does not you will be required to go to Downloads again and double click the installer icon again and allow it to run then follow the steps above to proceed
